📊 Key Insights from Road Accident Dashboard

1. **Total Impact**
   - 3000 accidents resulted in **15,000 casualties** and **7366 fatalities**
   - Indicates **high severity and multi-victim accidents**
2. **Accidents by State**
   - States like **Goa, Delhi, Sikkim** show higher accident counts
   - Accidents are **unevenly distributed across states**
3. **Year-wise Trend**
   - Peak in accidents around **2020–2021 (~526 cases)**
   - Slight decline observed afterward
4. **Vehicle Type Involvement**
   - **Auto-rickshaws and trucks** have the highest involvement
   - **Cars have the lowest involvement**
   - Commercial vehicles contribute more to accidents
5. **Accident Severity**
   - Minor (~35%), Fatal (~32%), Serious (~33%)
   - **Serious and fatal accidents form a large portion**
6. **Driver Gender**
   - **Male drivers (~60%)** involved more than females
   - Indicates higher exposure/risk among male drivers
7. **Alcohol Involvement**
   - Nearly **50% accidents involve alcohol**
   - Major contributing factor to road accidents
8. **Driver License Status**
   - Valid, expired, and no license cases are **almost equal**
   - Shows **weak enforcement of driving regulations**
9. **Road Type Analysis**
   - **State highways and village roads** have more accidents
   - **Urban roads have comparatively fewer accidents**
10. **Road Conditions**
